

Milano, 7-1-2015

Alba, distributing Mosaïque and Swamp brands, with more than 20 years of history, is leading in the segment of fashion accessories; Mosaïque is the brand for clothing, Swamp is the brand for leather accessories.

Mosaïque and Swamp are distributed in major European and world wide markets through a selected number of clothing shops and monobrand stores.

Mosaïque collection for next FW is revisiting two of our most classical accessories, scarves and socks.

Scarves are recalling an “ animalier ” feeling as they are proposing many patterns with animals designed; we are also revisiting our paisley heritage patterns with new feelings and colours.

Bright new in the collection is a series of scarves in limited edition with hand printed patterns and fully hand painted patterns on a new fabric with a mix of wool and cachemire.

Mosaïque is proposing again also **socks** which have patterns in common with the rest of the collection and are becoming an alternative for refined men during their leisure time

Swamp shoes collection proposes the classic products, like the "**pedula**", together with some new items.

Unusual for 2014 is the match between leather and **casentino** fabric on the shoe upper; casentino is a very characteristic and traditional fabric, water repellent and with a unique taste and feeling.

In addition, Swamp is also proposing **gaiters**, made with casentino and optionally attached to every shoe model.

Mosaïque stand at Pitti Uomo recalls the concept of travel and holiday; the design reminds the old trunks with rubber bands to contain dresses: all the products are out, ready to touch and ready to be compared.

This set up is one of the characterizing elements of Mosaïque and you can find it both in our monobrand stores (i.e. St Tropez) and in the corners within selected shops and department stores.
